GP10 and Aarhus Stress Group
Seminar

Monday 28 March at 14.00
Meeting room 20, AUH-Skejby
(use entrance 3 and turn right)

Multiple Acyl-CoA Dehydrogenation Deficiency (MADD)
From defect protein folding to oxidative stress and disturbed cell growth

PROGRAMME

14.00-14.30	**MADD; diagnostics and research in disease mechanisms** ***Rikke Olsen, PostDoc, Research Unit for Molecular Medicine, Aarhus University Hospital , Skejby***
14.30-15.00	**Defect Electron Transfer Flavoprotein folding in MADD** ***Claudio Gomes , Ass Prof, Instituto Tecnologia Química e Biológica (ITQB), Universidade Nova de Lisboa, Portugal***
15.00-15.20	**Coffee break**
15.20-15.50	**Molecular mechanisms of differences in riboflavin-sensitivity in MADD** ***Nanna Cornelius, PhD stud, Research Unit for Molecular Medicine, Aarhus University Hospital , Skejby***
15.50-16.20	**Protein dysfunction in mitochondrial fatty acid beta oxidation accounts for oxidative stress burden** ***João Rodrigues, PostDoc, Instituto Tecnologia Química e Biológica (ITQB), Universidade Nova de Lisboa, Portugal***
16.20-16.50	**Altered mRNA expression profiles in a patient with MADD** ***Frank Frerman, Professor, Department of Pediatrics, University of Colorado Health Sciences Center, Denver, USA***

Organised on behalf of:
The Aarhus Stress Group and the Graduate Programme
in Translational Molecular Medicine
The Faculty of Health Sciences
Aarhus University
